

Kalyan Matrimony

PROJECT DOCUMENTATION

Application Workflow Guide

How members, administrators and payments move through the Kalyan Matrimony platform.

DOCUMENT

Workflow Guide v1.0

DATE

25 September 2026

PLATFORM

Web application (desktop & mobile)

Platform overview

Kalyan Matrimony is a responsive web platform where brides, grooms and their families create verified profiles, discover compatible matches and connect safely. Every profile and photo is approved by an administrator before other members can see it.

User roles

Role	Who	What they can do
Visitor	Anyone browsing the website	View the home page, membership plans, About / Privacy / Terms / Safety pages and contact support. Must register to view profiles.
Member	Bride, groom, or a parent / sibling / relative registering on their behalf	Create a profile, upload photos, search and match, send interests, shortlist, chat, buy premium plans and view invoices.
Administrator	Kalyan Matrimony staff	Separate secure login. Approve profiles and photos, manage users, plans, payments, master data, website content, banners and support messages.

Modules at a glance

Member area

- Registration, email OTP verification, password or OTP login
- Detailed profile: personal, religion & horoscope, education, career, location, family, partner expectations
- Up to 6 photos (auto-optimised)
- Advanced search, preference-based matches, shortlist
- Interests, chat, contact details, notifications
- Membership plans, Razorpay payments, invoices

Admin panel

- Dashboard with members, approvals, subscriptions and revenue
- User management: approve, block, unblock, delete
- Profile approval and photo verification queues
- Verified badge for ID-checked members
- Membership plans & pricing, payments, subscriptions
- Religion, caste, education, occupation, state, city lists
- CMS pages, banners & advertisements, support inbox

Profile ID & web addresses. Each member receives a unique profile ID (e.g. **KM100023**) and a search-friendly profile address such as */profiles/km100023-priya*. Members' full names, phone numbers and emails are never shown publicly.

SECTION 2

Member workflow: registration to live profile

A new member goes from sign-up to a publicly visible profile in five steps. The profile becomes visible to others only after an administrator approves it.

Registration rules

Rule	Detail
Minimum age	18 years (checked from date of birth)
Unique account	Email and 10-digit Indian mobile number must not already be registered
Password	At least 8 characters with letters and numbers
Email verification	Required before using the member area. The code can be re-sent; limited to a few requests per minute to prevent abuse.
Photos	JPG / PNG / WebP, max 5 MB, at least 300×300 px. Automatically resized and compressed. First photo becomes the main photo (member can change it).
Horoscope file	Optional PDF / JPG / PNG up to 4 MB, stored privately

Login options

Password login

Email or mobile number plus password. "Remember me" keeps the member signed in.

OTP login

Enter email or mobile, receive a 6-digit one-time code, sign in without a password. A correct mobile OTP also marks the mobile number as verified.

Forgot password: the member enters their email and receives a secure reset link. Blocked accounts cannot sign in.

SECTION 3

Member workflow: discover & connect

Search filters

Looking for (bride / groom), age, height, marital status, religion, caste, mother tongue, star, diet, education, occupation, annual income, state, city, "with photo only", "verified only" and direct search by profile ID. Results can be sorted by newest, age or verified first. Only approved, active profiles ever appear.

Interest rules

Situation	What happens
Sender's own profile not yet approved	Interest cannot be sent until the admin approves the sender's profile
Same gender	Not allowed
Daily limit	Free: 5 per day · Gold: 50 per day · Platinum: unlimited
Duplicate	Only one active interest per pair. If the other member already sent one, the member is asked to respond to it instead.
Pending interest	Sender can withdraw it; receiver can accept or decline
Declined interest	Receiver may change their mind and accept later
Notifications	Receiver is notified of new interests; sender is notified when it is accepted or declined (email + in-app)

Who can chat, see contacts and view horoscopes

Feature	Free member	Gold / Platinum	After interest accepted
Chat	X	✓ with any member	✓ (any plan)
Phone number & email	X	✓ uses 1 contact view	✓ free (any plan)
Horoscope file, birth time & place	X	✓	✓ (any plan)

Viewing the same member's contact again never uses another contact view. Chat messages refresh automatically every few seconds; the receiver gets one notification per new conversation burst rather than one per message.

SECTION 4

Membership & payment workflow

Premium plans are paid online through Razorpay (UPI, cards, netbanking, wallets). Card and UPI details are handled entirely by Razorpay and are never stored by Kalyan Matrimony.

✓ Success

Payment successful page

Shows invoice number, amount, payment ID and plan expiry. Invoice can be printed or saved as PDF from "Payments & plan".

✗ Failed / cancelled

Payment failed page

Reason is recorded and shown. Member can retry. No plan is activated.

Safeguards

- **Tamper-proof:** a plan is only activated when Razorpay's digital signature matches; forged confirmations are rejected and logged.
- **Browser closed mid-payment:** Razorpay also notifies the server directly (webhook), so the plan still activates automatically.
- **No double activation:** the same payment can never create two subscriptions.
- **Full audit trail:** every attempt (paid, failed, incomplete) is visible to the admin with Razorpay order and payment IDs.

Subscription lifecycle

Action	Result
Renew the same plan early	New validity is added on top of the remaining days
Switch to a different plan	New plan starts immediately; the previous one is closed
Plan expires	Chat with non-connected members and new contact views stop; existing conversations remain readable

SECTION 5

Administrator workflows

The admin panel is reached through a separate login page and is not accessible to members.

Daily moderation routine

Status reference & notifications

Status reference

Item	Status	Meaning
Profile	Pending	New or resubmitted; hidden from other members
	Approved	Live in search and matches
	Rejected	Hidden; reason shown to the member; resubmitted when edited
Photo	Pending	Visible only to the owner
	Approved	Shown on the profile and in search
	Rejected	Not shown; member asked to upload another
Interest	Pending	Waiting for the receiver's response
	Accepted	Members are connected: chat, contacts, horoscope
	Declined	Receiver said no (may still accept later)
	Withdrawn	Sender cancelled before a response
Payment	Paid	Verified; plan active; invoice issued
	Failed	Declined, cancelled or verification failed
	Incomplete	Checkout started but not finished
Account	Active	Normal access
	Blocked	Cannot sign in; hidden from search
	Verified	Trust badge shown on the profile (after ID check)

Notifications sent to members

Event	In-app (bell)	Email
Verification / login one-time code	—	✓ (or SMS)
Profile approved or rejected	✓	✓
Photo approved or rejected	✓	—
New interest received	✓	✓
Interest accepted or declined	✓	✓
New chat message	✓	—
Payment successful (with invoice link)	✓	✓
Membership expiring in 3 days / expired	✓	✓
Reply to a support message	—	✓

Membership plans & go-live checklist

Current plan configuration

All values can be changed by the administrator at any time from *Membership Plans*.

Feature	Free	Gold	Platinum
Price	₹0	₹2,999	₹5,999
Validity	No expiry	90 days	180 days
Profile, photos, search & matches	✓	✓	✓
Interests per day	5	50	Unlimited
Chat	After acceptance	✓ Any member	✓ Any member
Contact views	—	50	150
Horoscope access	—	✓	✓
Highlighted in search results	—	—	✓

Go-live checklist: items required from you

- ☐ **Domain name & hosting:** a server with PHP 8.2+, MySQL/MariaDB and an SSL certificate (https)
- ☐ **Razorpay account:** KYC-completed account; live API Key & Secret, and a webhook secret
- ☐ **Email sending (SMTP):** for verification codes, password resets and notifications (e.g. Google Workspace, Zoho, Amazon SES)
- ☐ **SMS gateway** (optional, for mobile OTP): e.g. MSG91 or Twilio with a DLT-registered sender ID and template
- ☐ **Business contact details:** official support email, phone number and address for the website and invoices
- ☐ **Legal content review:** Privacy Policy and Terms & Conditions reviewed by your legal advisor
- ☐ **Brand assets:** final logo and any additional banners
- ☐ **Administrator account:** email address for the main admin login (password shared securely, not by email)

Next steps. Once the items above are received, we will configure the live environment, run a test payment in Razorpay test mode, walk your team through the admin panel, and schedule the launch.
